The screenshot displays the RapidAPI interface for the Nutritionix - Nutrition Database API. The page header shows the API name, version (v1.1), and a 'FREE' badge. Below the header, there are tabs for 'Endpoints', 'About', 'Tutorials', and 'Discussions'. The 'Endpoints' tab is active, showing a list of endpoints on the left: 'GET UPC Scan' and 'GET Food Search'. The 'GET UPC Scan' endpoint is selected, and its details are shown in the main area. This includes a 'Test Endpoint' button, a 'Code Snippets' tab with a Node.js Axios example, and a 'Header Parameters' section with an 'X-RapidAPI-Key' value.
